The **CMCP570 Solid State Temperature Transmitter** and **CMCP570A Solid State Temperature Monitor** are compatible with industry standard dual output or "T" type Accelerometers that have an internal temperature sensor. The temperature signal is processed into a 4-20 mA output that is proportional to the overall range. The 4-20mA signal can then be sent to the Plant PLC/DCS or other control system. An OK Fault Detection Circuit is provided along with a Timed OK Danger Defeat Circuit to prevent false alarms. The CMCP570 can be optionally ordered as the CMCP570A Monitor and be equipped with the optional alarm module that provides OK, Alert and Danger Alarms, along with relays, adjustable time delays and adjustable set points for standalone machine protection.
